

Athena Edu. - Digital Education Platform

Objective: To design and implement a comprehensive digital learning platform, that decentralizes the educational model by empowering professors globally, enhances student engagement through a feature-rich environment, and bridges the gap between academia and industry by integrating employer feedback and opportunities, all while ensuring easy accessibility for all students.

1. Introduction

In recent times, the educational landscape has been undergoing a significant transformation. Moving away from the traditional institution-centric approach, there's a discernible shift towards a more decentralized, professor-led model. This evolution is further catalyzed by the proliferation of digital platforms, presenting a unique opportunity to leverage technology in making education both more accessible and affordable.

This report introduces "Athena Edu.", a state-of-the-art digital learning platform. Drawing inspiration from Athena, the Greek goddess renowned for her wisdom, the platform embodies the principles of knowledge and enlightenment. Developed using Apache NetBeans and meticulously coded in the Java programming language, Athena Edu. has been designed with the end-user in mind. It boasts a feature-rich environment complemented by a vibrant and intuitive user interface, ensuring a seamless and engaging learning experience for its users.

2. Proposed Idea

Athena Edu. is meticulously designed to cater to four distinct user roles: Students, Professors, Admins, and Employers, each with unique functionalities and interactions within the platform.

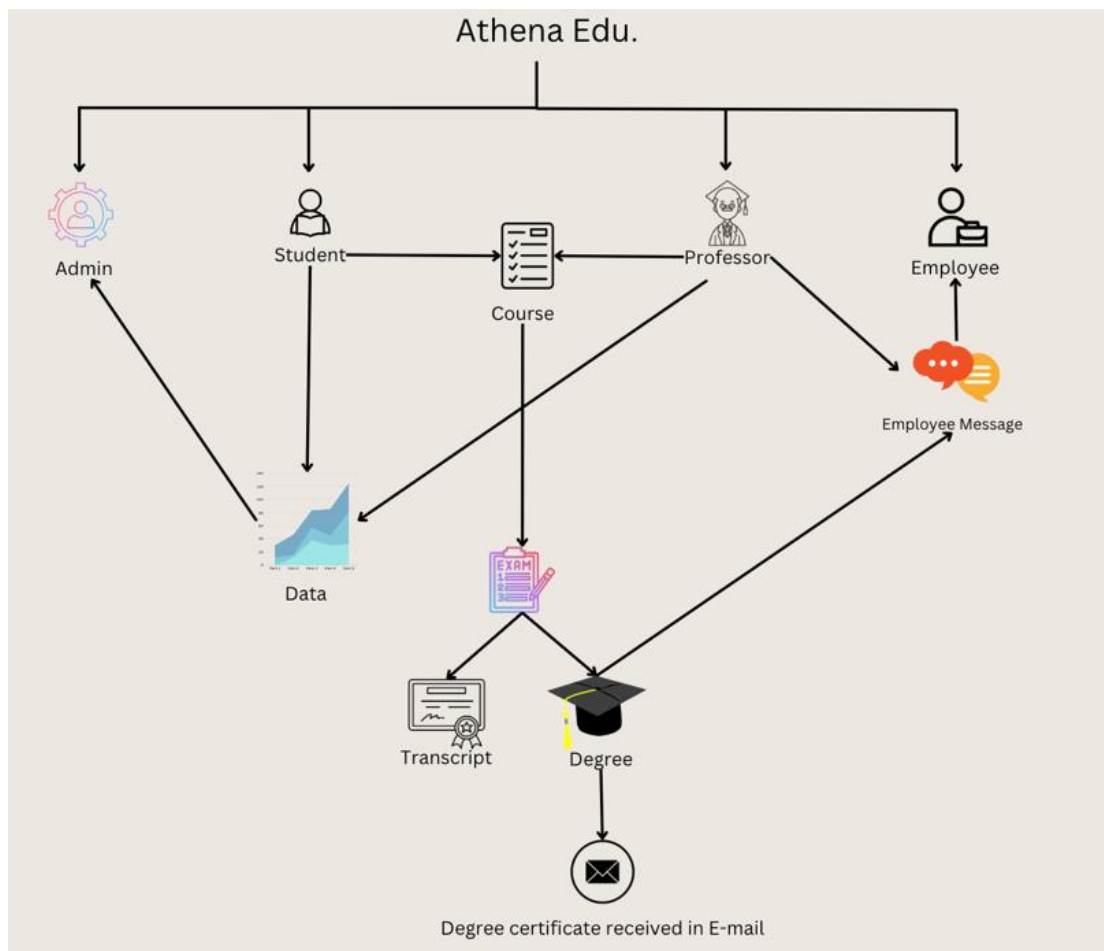

Professors: Central to the platform's educational model, professors from around the globe can register on Athena Edu., offering a diverse range of courses. Their autonomy in course management allows for a dynamic and responsive curriculum, tailored to meet the evolving needs of students.

Students: Students are provided with a rich array of courses from various professors, enabling a flexible and comprehensive learning journey. The platform facilitates their academic progression towards graduation, requiring the successful completion of eight courses as a prerequisite for earning their degree.

Admins (Platform Owners): Admins have access to a robust analytics dashboard, providing insights into various performance metrics such as student achievements and professor ratings. This data-driven approach empowers stakeholders to make informed decisions to enhance the educational quality and overall user experience on the platform.

Employers: A novel feature of Athena Edu. is the inclusion of an employer section, fostering a direct connection between the academic and professional realms. Employers can access profiles of graduated students, facilitating recruitment processes by identifying potential candidates for job openings. Furthermore, employers can engage in meaningful dialogues with professors, fostering a synergy that allows course structures to be refined in alignment with industry demands and expectations.

Workflow of Athena Edu.

Overview of Athena Edu. Features:

General Features:

- **New User Creation:** Athena Edu. welcomes students and professors globally to register by providing basic details, user ID, and password.
- **Credential Verification:** Users undergo a credential check, post which they're directed to a personalized homepage with tailored features.
- **Employer Messaging:** Employers can view profiles of graduates, communicate job opportunities, and liaise with professors for course improvements.
- **Admin Statistics:** This section displays a comprehensive overview of student GPAs, graduation statuses, and professor ratings.

Features for Professors:

- **Course Offering:** Professors can introduce new courses each term, complete with schedules and a "Useful for" section to guide student choices.
- **Syllabus:** Course creation includes detailing the syllabus, offering students a glimpse into the curriculum.
- **Announcement:** A dedicated space for professors to relay crucial course-related information to enrolled students.
- **Exam:** Professors can set up exams, allowing enrolled students to participate and receive grades.
- **Enrolled Students Overview:** Professors can view a list of students, their exam grades.
- **Feedback:** Anonymized feedback from students assists professors in refining their courses.
- **Validation:** Measures are in place along with prevention of course duplication and ensure exams are accessible only when intended.

Features for Students:

- **Course Registration:** Students can search and register for courses using various filters, including professor name, topic, region, language, etc.

- **Course Module Access:** Enrolled students gain access to all course modules, from announcements to exams.
- **Progress Tracking:** Students can monitor their degree progression and current GPA at any time.
- **Peer Chat:** An interactive feature allowing students of the same course to collaborate and learn together.
- **Professor Rating:** Students can rate their professors, contributing to an average rating displayed on Athena Edu.
- **Feedback:** A platform for students to provide anonymous feedback, fostering open communication.
- **Scholarship:** High-performing students are recognized and rewarded with scholarships based on their grades.
- **Transcript & Degree:** Students can download transcripts whenever required and, upon completing eight courses, they receive degree certificate with unique ID via email.
- **Validation:** Safeguards are in place along with prevention to double enrolment and limit course registration to eight.

3. Design Methodology

There were separate java classes created namely – Students_details, Students_details_list, Professor_details, Professor_details_list, Course_details and the Course_details_list.

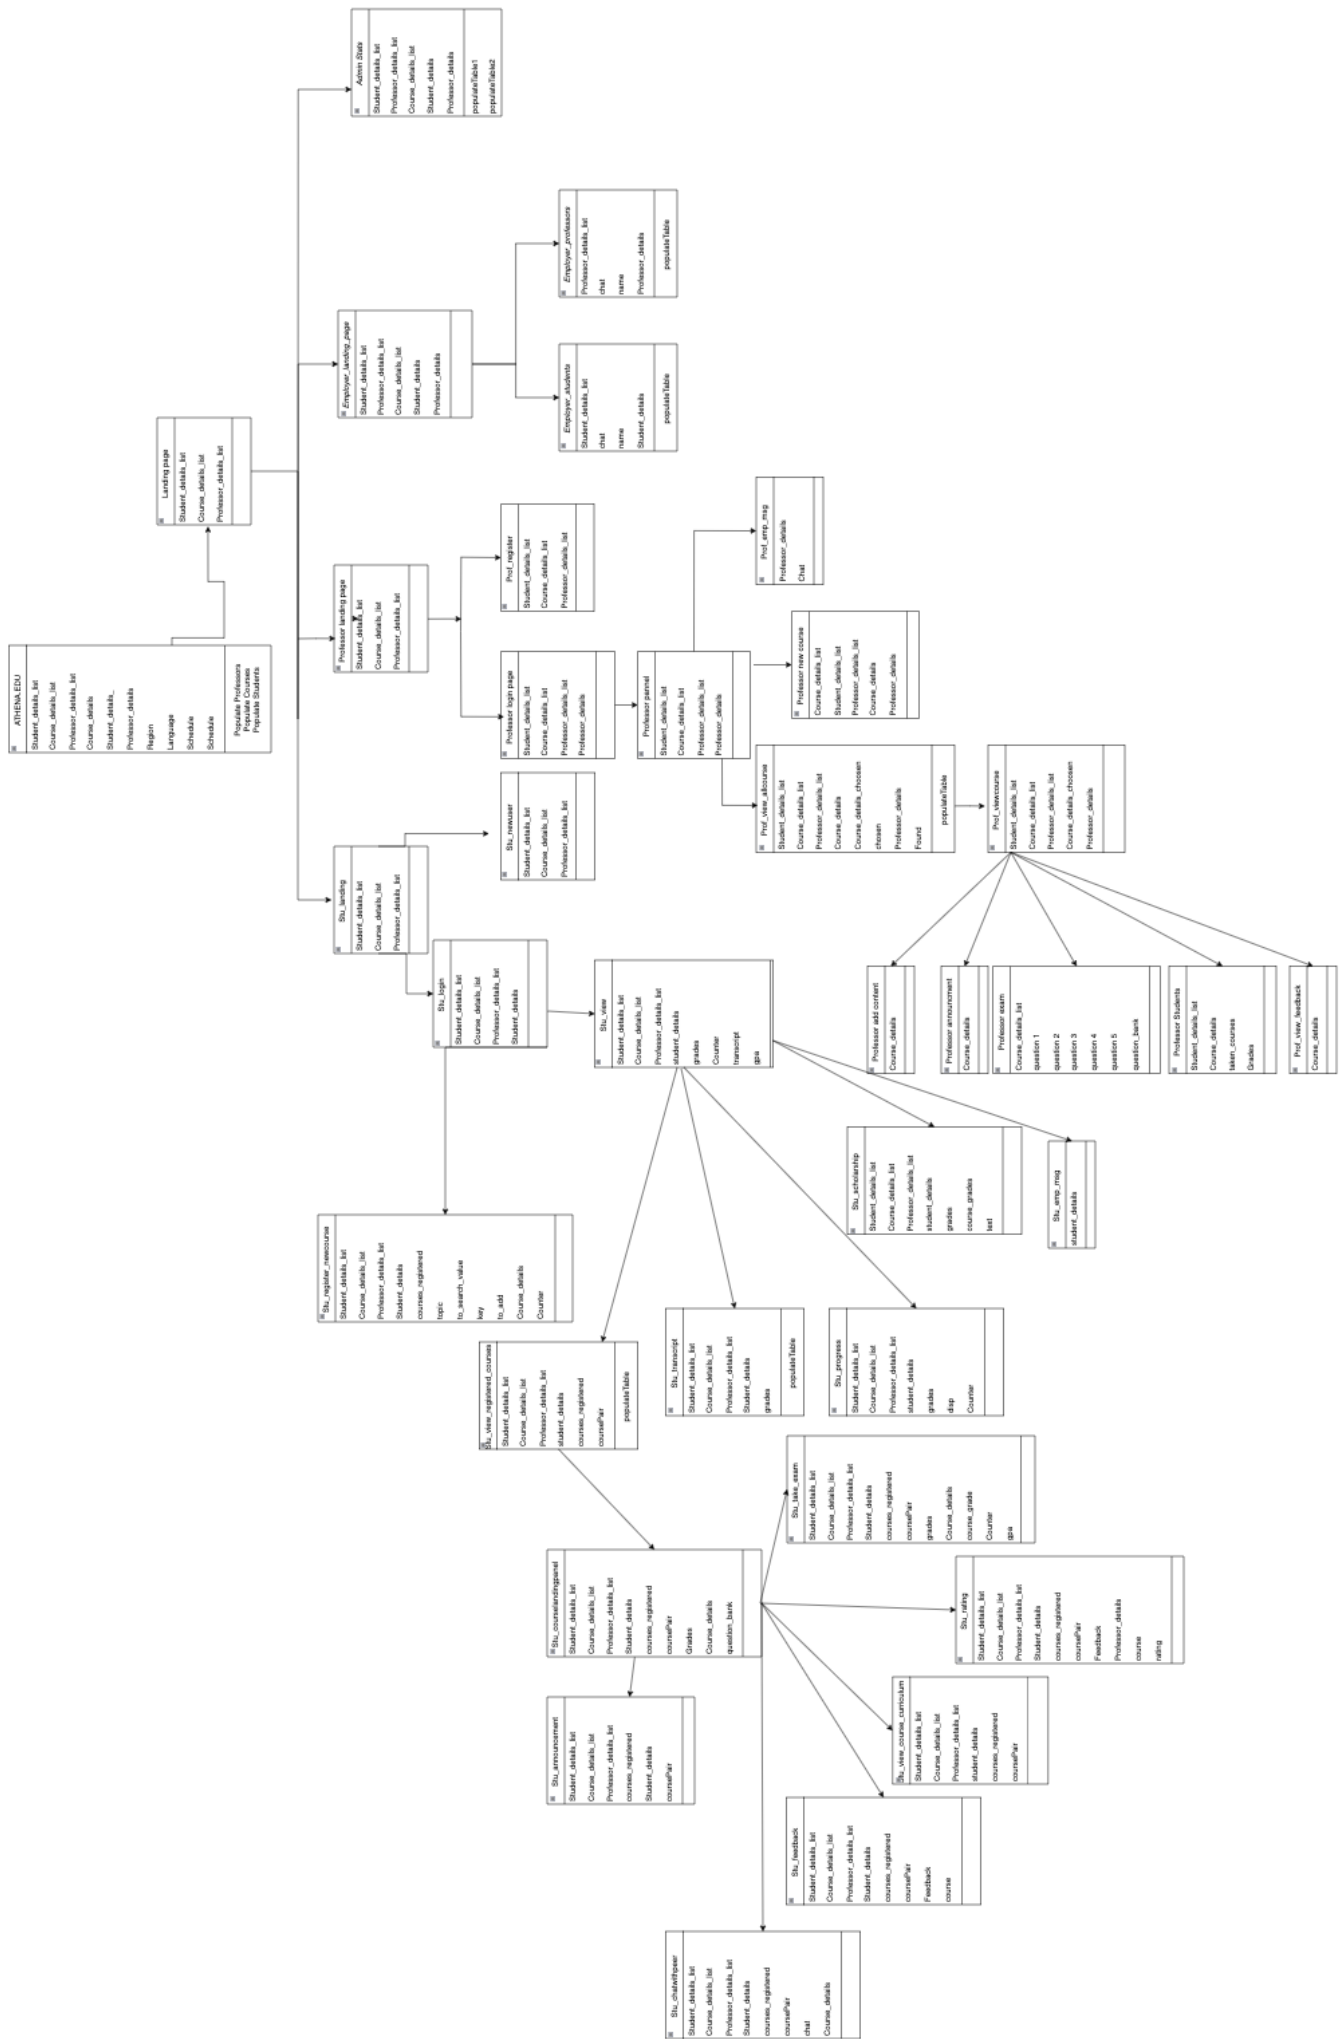

How Athena Edu. is different from traditional university setup:

Athena Edu. stands at the forefront of education, not only offering a professor-led, decentralized model but also introducing features that redefine the learning experience. Professors from around the world engage students through direct messaging, providing support and addressing their concerns, a unique approach when compared to traditional universities. Furthermore, students have the flexibility to engage in chats with their peers at any time, promoting collaborative learning. They can track their progress exponentially, ensuring that their educational journey remains on course.

In a departure from the norm, students have the opportunity to rate their professors, providing valuable feedback on teaching skills and overall course experiences. To motivate and recognize excellence, Athena Edu. also provides scholarships for students who meet predefined criteria, rewarding high performers and encouraging academic achievement.

Moreover, Athena Edu. takes it a step further by offering the opportunity for students to gain prestigious third-party certifications directly from their dashboards, making the pursuit of knowledge more accessible and productive. This innovative approach ensures that Athena Edu. not only erases geographical boundaries, making education globally accessible but also fosters a dynamic, interactive, and rewarding educational environment for all. However, it's essential to address universal internet access and device availability challenges to fully unlock the potential of these features.

The java classes containing the required attributes and methods that were necessary for Athena Edu. to function are mentioned in the below diagram.

Demonstration of Use cases:

- System startup with all the initial configurations all worked out. These include universal student directory, a universal certification authority to say if a student is ready to graduate. A student is ready to graduate with an MS degree if they take 8 courses max. A directory of available courses and associated search capabilities will be in place to serve students.

Courses directory with search capabilities:

The screenshot shows the 'Athena Edu.' Student Portal. At the top, there's a header with the title 'Student Portal'. Below it, a search bar with the placeholder 'Enter the Keyword' and a dropdown menu for 'Professor_Name'. A 'Search' button is positioned below the search bar. The main content area features a table with 7 columns: Topic, Professor, Schedule, Useful for, Language, Term, and Region. The table lists 10 topics, each associated with a professor, a schedule, a usefulness rating (DS), a language, a term (Spring 2024), and a region. Below the table, there's a 'View Details' button. Further down, there's a 'Syllabus' input field, a 'Professor Rating' input field, and a 'Professor Specialty' input field. At the bottom, there are 'Register' and '<Back' buttons.

Topic	Professor	Schedule	Useful for	Language	Term	Region
Topic1	Professor1	Monday 9am to 10am	DS	English	Spring 2024	United States
Topic2	Professor2	Tuesday 11am to 12pm	DS	Spanish	Spring 2024	Canada
Topic3	Professor3	Wednesday 1pm to 2pm	DS	French	Spring 2024	United Kingdom
Topic4	Professor4	Thursday 3pm to 4pm	DS	German	Spring 2024	Germany
Topic5	Professor5	Friday 5pm to 6pm	DS	Chinese	Spring 2024	France
Topic6	Professor6	Saturday 7pm to 8pm	DS	Japanese	Spring 2024	Australia
Topic7	Professor7	Monday 10am to 11am	DS	Russian	Spring 2024	Japan
Topic8	Professor8	Tuesday 2pm to 3pm	DS	Arabic	Spring 2024	Brazil
Topic9	Professor9	Wednesday 4pm to 5pm	DS	Hindi	Spring 2024	India
Topic10	Professor10	Thursday 6pm to 7pm	DS	Portuguese	Spring 2024	China

Admin panel showcasing the list of professors and students available at the start of application:

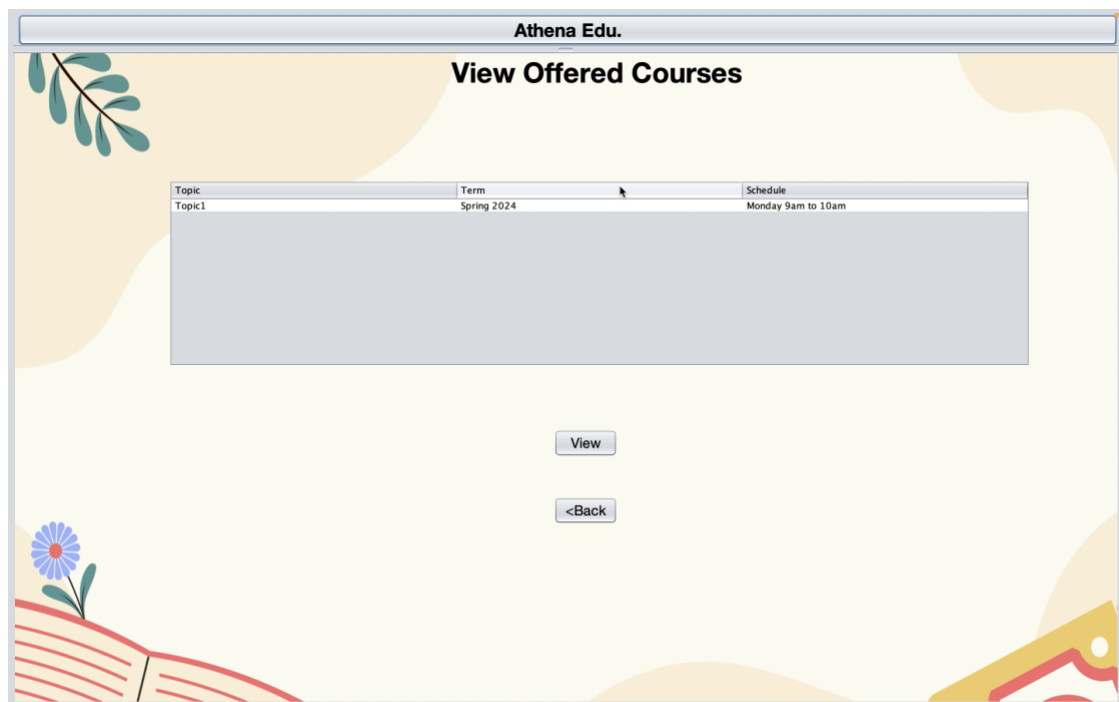

The screenshot shows the 'Athena Edu.' Admin panel, specifically the 'Statistics' section. It features two tables. The first table, 'Student Name', lists 10 students (Student1 to Student10) with their 'Graduated' status (all 'No') and 'GPA' (all '0.0'). The second table, 'Professor Name', lists 10 professors (Professor1 to Professor10) with their 'Rating' (all '0.0'). At the bottom, there is a '<Back' button.

Student Name	Graduated	GPA
Student1	No	0.0
Student2	No	0.0
Student3	No	0.0
Student4	No	0.0
Student5	No	0.0
Student6	No	0.0
Student7	No	0.0
Student8	No	0.0
Student9	No	0.0
Student10	No	0.0

Professor Name	Rating
Professor1	0.0
Professor2	0.0
Professor3	0.0
Professor4	0.0
Professor5	0.0
Professor6	0.0
Professor7	0.0
Professor8	0.0
Professor9	0.0
Professor10	0.0

Additionally, the degree provider third party code was set to be in place by including necessary libraries and code.

- A professor can sign up to the service and then able to manage their course catalog (1 or 2 courses) and semester-based course schedule.

- Students would signup to use the system. A transcript is creating accordingly

Athena Edu.

4. Assessment and Opinion

The emergence of digital platforms, exemplified by Athena Edu., marks a transformative phase in the educational landscape. The central question remains: Can such platforms genuinely democratize education for the underprivileged?

In terms of **accessibility**, digital platforms erase geographical limitations. With an internet connection, students from any location can access global knowledge. However, the challenge of the digital divide persists. Ensuring universal access to the internet and the necessary devices becomes paramount.

Considering **affordability**, digital platforms present a distinct advantage. Without the overheads of traditional institutions, these platforms can offer quality education at reduced costs. The direct professor-student engagement model of Athena Edu. might lead to competitive course pricing while maintaining educational quality.

On the front of **empowerment**, many among the less fortunate face a lack of guidance, mentorship, and resources. Digital platforms bridge this gap. Features such as peer interactions, direct feedback from professors, and avenues for employer engagement transform these platforms into more than just educational tools; they become gateways to broader opportunities.

In conclusion, while the promise of digital educational platforms is immense, their success will be determined by how effectively they address these multifaceted challenges and truly level the educational playing field. Hoping that through educational platforms like Athena Edu., many of the barriers in traditional education system can be surpassed.
